SUMMARY

Software Developer with more than 4.6 years of experience delivering scalable and maintainable enterprise-level applications. Proven expertise in .NET ecosystem including C#, VB.NET, ASP.NET, MVC, .NET Core, and Entity Framework. Strong leadership in project ownership, cross-team collaboration, and improving system performance. Seeking senior level opportunities to architect and deliver robust .NET based business solutions.

TECHNICAL SKILLS

C#	VB.NET	JavaScript	ASP.NET	SQL Development	
Postman API	MVC	Entity Framework	Azure	GitHub	
Web Forms	Crystal Report	WinForms	Debugging		
Source Safe	Problem Solving				

PROJECTS

Irth Land Management

- SaaS platform, which is a software system for managing land rights and assets, for industries like energy, renewables and government

Order Booking Web Application

- Developed responsive web-based system with real-time inventory sync and notifications.

Retail Billing & Garment Manufacturing ERP

- Designed GST-enabled POS and production workflows for multi-store deployment.
- Inventory Management system with barcode-based stock tracking system.

Diamond ERP System With Accounting

- Engineered multi-module ERP for stock, customer, and billing with crystal reporting.

Online College Admission System

- Full-stack web application managing student registration and admission workflows.

INTERESTS

 AI and Machine Learning Interested in exploring AI and machine learning technologies to drive intelligent software solutions.	 Learning New Programming Languages Fascinated by uncovering new programming paradigms and applying them to real-world problems.
